NEVADA FARM INCOME REPORT, 1935

The cash income from Nevada farms for all crops, livestock, and livestock products is estimated by the Bureau of Agricultural Economics, of the United States Department of Agriculture, as \$10,624,000 for 1935, compared to the revised figure of \$7,664,000 for 1934. The total value of all crops (products of the soil) for 1935 is \$4,528,000, of which the hay crop was valued at \$3,334,000. The value of production from livestock in 1935 is estimated at \$10,075,000. The difference between the cash income and the value of production represents the value of products consumed on the farm and in the farm home.

For the United States as a whole the total cash income for 1935 is estimated at \$7,203,000,000, as compared to \$6,225,000,000, the revised figure for 1934.

CASH INCOME, INCLUDING BENEFIT PAYMENTS, FROM ALL
FARM PRODUCTION.
